NO. 01

SOLUM

THE SINGLE MODULE HOME

HAAVN.AU

BLACK SERIES · ANCILLARY DWELLING

SOLUM

One module. *Complete.*

so·lum

/ˈsəʊ.ləm/ · LATIN · NOUN

I. The ground. The floor. The base on which a thing stands.

II. The soil itself, and its living layer: the upper ground where roots take hold.

We gave the smallest home in the range the oldest word for ground. SOLUM is where HAAVN BLACK begins: a single module, set lightly on its site and made to belong to the place it stands on. Nothing added for the sake of it. Everything resolved.

Luxury is *certainty.*

A house is still built the way it was a hundred years ago. On a muddy site, by hand, one at a time. HAAVN BLACK begins from the opposite idea. The home is designed as a product, resolved completely before anything is made, then manufactured in a factory where a millimetre matters and weather does not. What arrives on site is not a frame. It is the home.

01

Resolved, not adjusted

Every junction, service and finish is settled in design. Nothing is decided later with a saw in hand, so nothing drifts.

02

Made under a roof

Modules are built in a controlled factory to tolerances a building site cannot hold, then transported complete.

03

Certain on site

Install is measured in days, not seasons. Less risk, less finance, less of the mess that makes building painful.

“

A home should feel like a deep breath.

I dreamed of a space that speaks simply, that breathes with the land around it and still belongs to the life of the city. HAAVN BLACK is that idea, carried from the first line to the last detail, so the home you walk into is exactly the home that was imagined.

Jamie Baldwin

FOUNDER · HAAVN BLACK

Nothing is lost between the *drawing* and the home.

"Simplicity is the hardest thing to build. We designed SOLUM exactly as it is made, to the millimetre, so the home that arrives is the home we drew. It works from the first day, and it never stops feeling like architecture."

Callum Fraser

Black is a *discipline.*

A dark, quiet envelope with warmth held inside. The palette is deliberately short: fewer materials, better ones, detailed properly. Every facade shares the same black windows, flashings and trims, so the home reads as one object whichever skin it wears.

01

Yakisugi

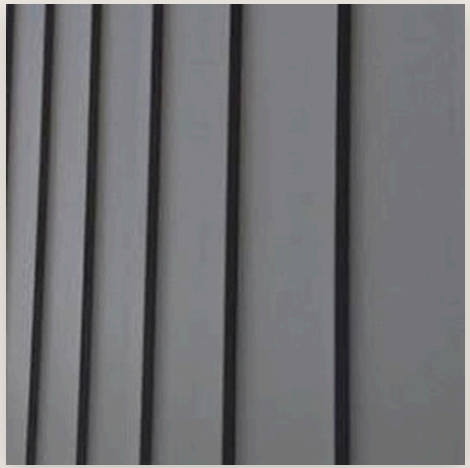

- Black windows, flashings, trims
- Matching trims throughout

08 · INSIDE

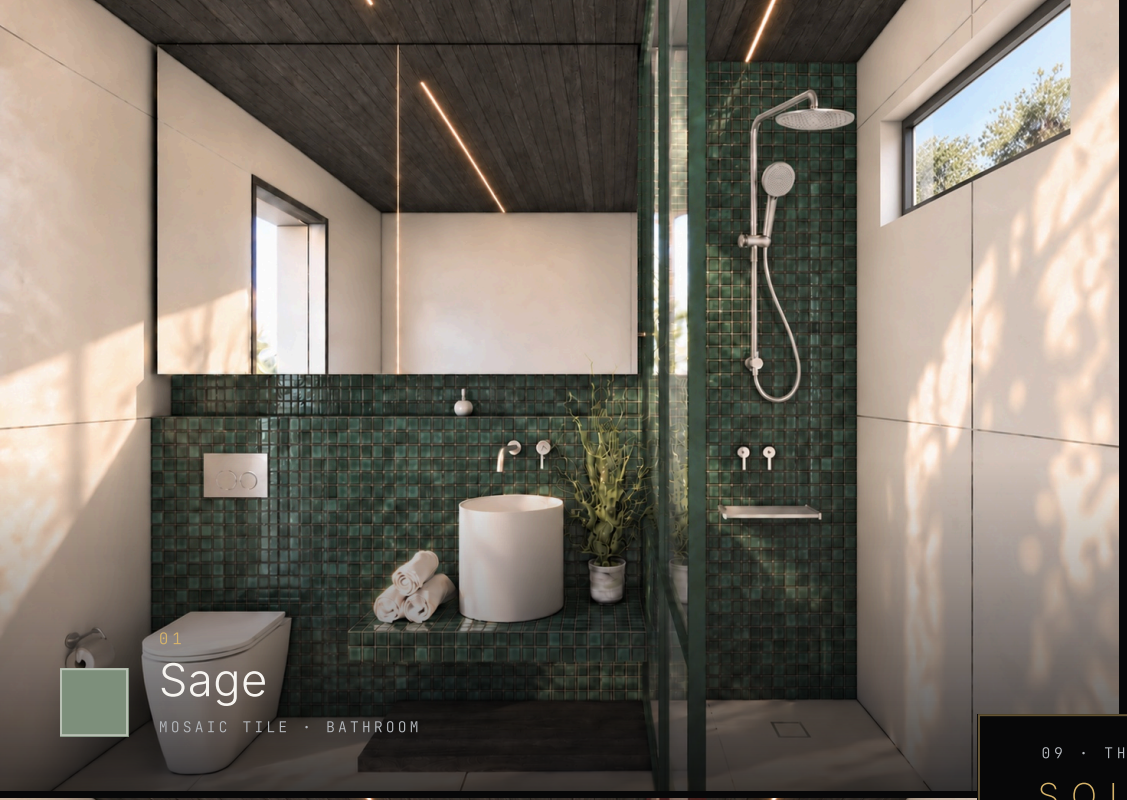

Timber, tile, *light.*

Timber planks overhead, matching fixed joinery, and one tile colour running through the home. Light comes in through narrow floor reaching windows and softens through the day. Four tiles. Two timber schemes. Morning and night.

KITCHEN · DINING

BEDROOM

KITCHEN · DINING · BEDROOM

Small, and *never* short of anything.

A galley kitchen along one wall in matching timber, with an induction cooktop and dishwasher drawer, integrated finger pulls, a standalone cylindrical hood and a continuous shelf over the mosaic tile splashback, and fridge, pantry and laundry behind full height doors. At the far end, a bedroom with full height wardrobes, a bed niche and a high window.

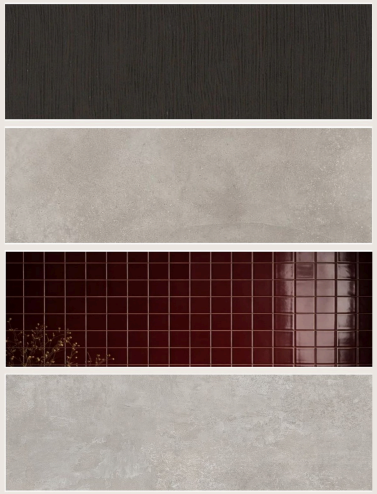

BATHROOM · FINISHES

Detailed *properly.*

Mosaic tile in your choice of colour against large format stone, a recessed half height pedestal basin integrated into the shelf, a niche above the toilet, a frameless mirror, a high window and a framed screen to the shower.

CEILING	Timber planks, matching
WALLS & FLOORS	Large format stone tile
JOINERY	Raw Walnut or Dark Oak
MOSAIC	Sage, Tide, Burgundy or Vine
TAPWARE	Brushed silver
LIGHTING	Concealed LED · spotlights
WINDOWS	Sheer linen

THE SPACES WITHIN

What *arrives.*

SOLUM is manufactured whole as one module and delivered complete. What follows is the home as designed. **Everything here is standard. There is no base specification, no upgrade list and no high grade option, because the high grade is what we build.**

FORM	A single factory finished module, 12.6 × 4.2 m on a 4.2 m structural grid, raised on posts. 13.4 × 4.5 m overall.
FACADE	Four finishes: Yakisugi charred timber, Blackbutt timber, Black standing seam steel or Light mineral panels (Equitone fibre cement). Black windows, flashings and trims throughout.
GLAZING	Narrow floor reaching windows to the living and bedroom, central double sliders and three slim black awnings. Living and bedroom 1,800 × 2,400, walk out sliders 3,950 × 2,400, bedroom high window 2,000 × 400 and shower high window 1,000 × 400. Concept C1, subject to architectural coordination.
KITCHEN	Galley kitchen in matching timber with integrated finger pulls. Induction cooktop and dishwasher drawer, sink, drawers, pantry and fridge. Standalone cylindrical hood and a continuous shelf over a mosaic tile splashback.
APPLIANCES	A premium appliance package, included as standard. Induction cooktop, oven, integrated dishwasher, integrated refrigeration, rangehood, and a washing machine and dryer.
LIVING	Living room at the end of the module, opening to the deck option. Matching timber ceiling planks and fixed joinery, full height cupboards and a black three blade fan.
BEDROOM	Bedroom with full height wardrobes, a bed niche, a black fan and a high window.
BATHROOM	Walk in shower with a framed screen, a recessed half height pedestal basin integrated into the mosaic shelf, wall hung toilet with a niche above, frameless mirror and a high window.
ENERGY	Rooftop solar and battery storage, with inverter and monitoring, included as standard. The home carries its own power.
COMFORT AND CONTROL	Home automation for lighting, climate and access, and blinds throughout. Standard, not an upgrade.
SERVICES	A dedicated install cupboard for the inverter, battery and services.
INTERIOR PALETTE	Four tile colours, Sage, Tide, Burgundy and Vine, with two timber schemes, Eveneer Raw Walnut or Dark Oak, matched across the ceiling planks and fixed joinery.
OPTIONS	Deck, entry deck, outdoor kitchen with barbecue joinery, fridge and sink, rear entry.

Images and specification are indicative and may change as design is finalised. Furniture, landscaping and styling are shown for illustration and are not included. Renders are image studies and are not dimensionally exact to the architectural model. Material colour changes with light, so finishes are specified from physical samples. Final specification is confirmed at contract. Design by Fraser & Partners for HAAVN.
